

Product Specifications

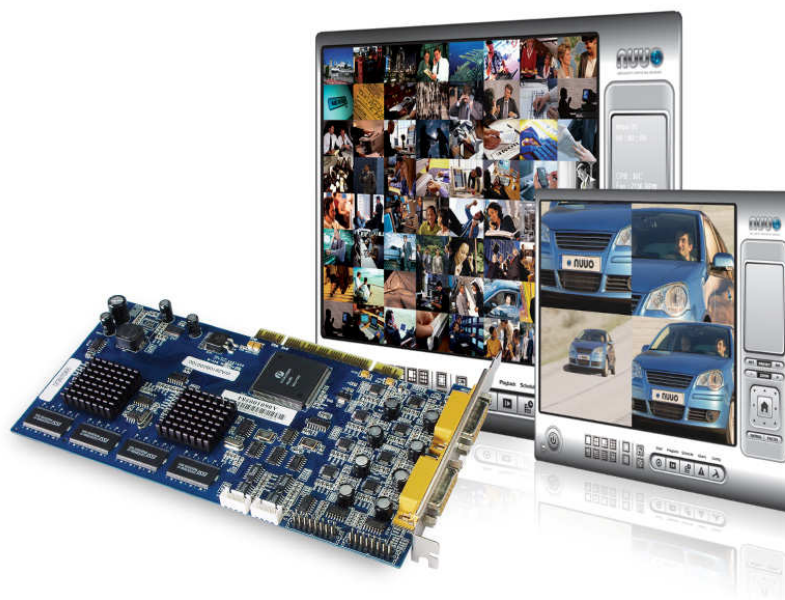

NUUO-NDVR, the “Hybrid Solution”

Install the latest IP cameras without removing the original analog system. By installing NUUO video capture card SCB series along with NUUO surveillance management software, NUUO-NDVR the “Hybrid Solution” enables IP and analog surveillance cameras to work together within one application. NUUO Hybrid solution can manage a comprehensive combo of 64 channels, simultaneous.

The Hybrid solution is the budget saving, cost-effective solution. Capture cards compress video in two ways, H.264 hardware compression for stability and MPEG-4 software compression for your convenience. The software features with NUUO NVR system, dual monitor display, “Smart Guard” detection in 6 ways, instant response in 6 ways plus 3GPP supports, intelligent search for detected events, GUI recording schedule, real-time AV viewer and filter, video enhancement tools, instant playback system, complete system and event log database, and I/O device integration.

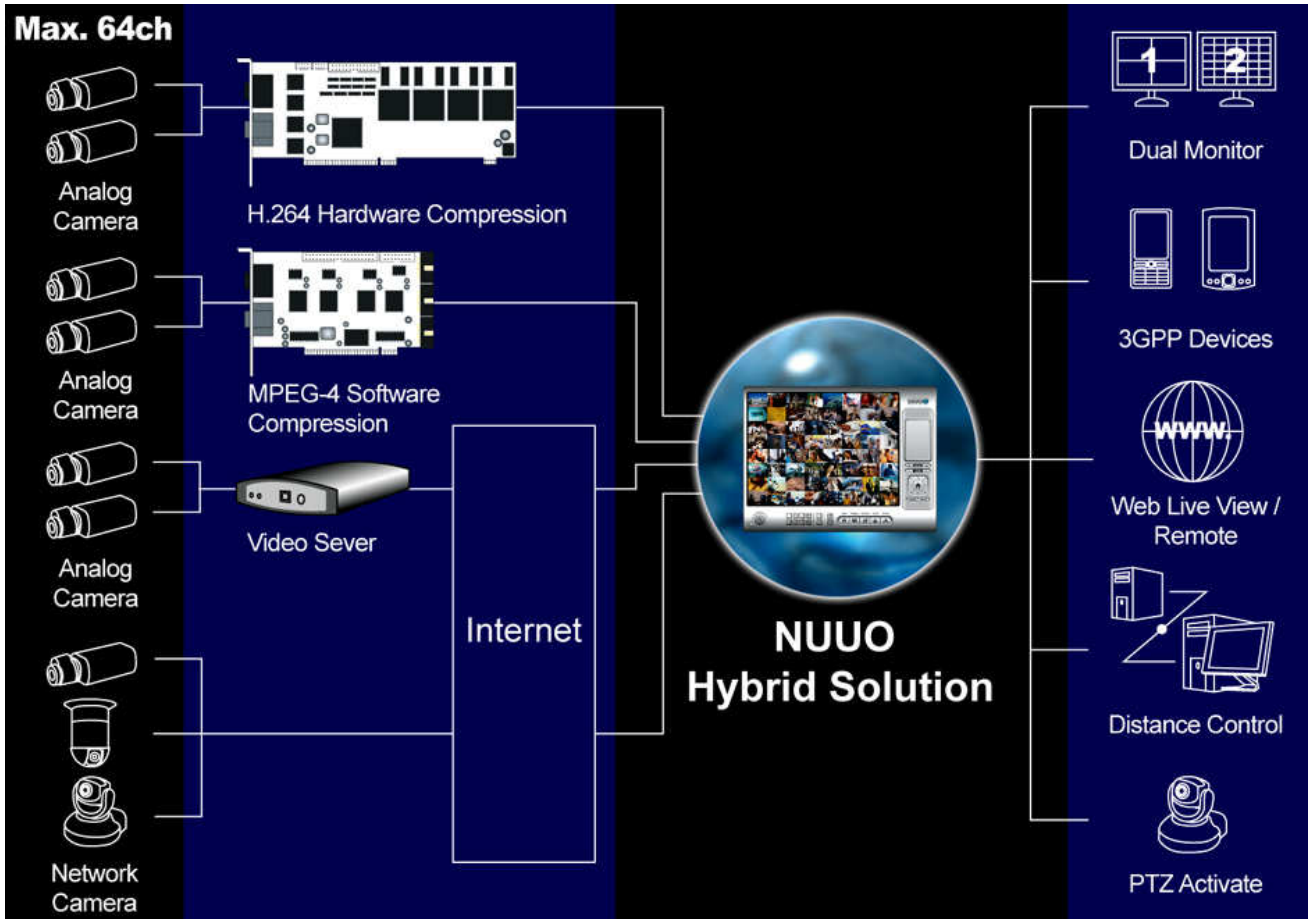

Main Features:

- Manage a comprehensive combo of 64+ channels from IP and analog cameras
- HD quality definition
- Dual monitor Real-Time display and Playback
- Intelligent detection and instant response
- Intelligent Search for motion, missing objects, foreign objects, and more
- User friendly "GUI Recording Schedule" interface
- Real-Time A/V multi-events viewer and filter
- Video Quality Enhancement Tools
- D1+ recording resolution
- Instant Playback System
- Complete system and event log database.
- PTZ reaction presets
- I/O device integration
